

Forward request / bounded feedback

Two left-to-right protocol lanes terminate at the same checked commitment interface.

Forward request resolution

sender-local binding / delivered REQ / one checked object

Bounded feedback resolution

ACCEPT / COUNTER trigger call 02; REJECT closes the candidate

Parser-valid records

```
FORWARD SELF resource.obtain(q=8,item=oak_planks) > resource.deliver(q=8,item=oak_planks,to=agent_b)
REQ agent_b craft.item(bind=WORK_BRANCH,q=1,input=oak_planks,item=crafting_table)

COUNTER counter_offer_id=CRAFT_AT_REQUESTER_HANDOFF_FINISHED
SELF craft.item(q=1,input=oak_planks,item=crafting_table) > resource.deliver(q=1,item=crafting_table,to=agent_b)
REQ agent_b resource.deliver(q=1,item=crafting_table,dst=order_chest)
```

Written books mark learned commitment records; the name tag marks the bounded symbolic response identifier.
